

## **Alessandro Chiabrera Award for Excellence in Bioelectromagnetics**

The Council of the European Bioelectromagnetics Association  
awards the 2021 Alessandro Chiabrera Award to

**Dr Lea Rems**

For her excellent multiscale modeling work in the field of cell electroporation. Beside her brilliance and wide range of scientific interests, her outstanding contributions emerged in the investigations of the mechanisms underlying responses to pulsed electric fields.

The EBEA Council believes that her research will continue to provide important contributions to the advancement of knowledge for electroporation-based technologies and treatments.
